Reliable Power, Repeatable Results

- Single and dual outputs
- Dual range output
- 30 W to 100 W output power
- Front and rear output terminals
- Over-voltage protection
- Remote Sensing
- GPIB and RS-232 standard
- Save and recall functions

Great Performance, Outstanding Price

With the output power of 30 to 100 W, the Agilent E364xA Series programmable DC power supplies provide great performance at a great price. All ten models deliver clean power, excellent regulation, fast transient response and built-in GPIB and RS-232 interfaces. They are designed to meet the needs of R&D design verification, production testing, QA verifications, and other demanding applications with Agilent Technologies’s quality and reliability.

Steady Output

With 0.01 percent load and line regulation, Agilent E364xA power supplies are able to maintain a steady output when power line and load changes occur. They also specify normal mode voltage noise and low common mode current noise. The low normal mode noise specification assures clean power for precision circuitry applications, and the low common mode current provides isolation from power line current injection. Agilent E364xA power supplies specify less than 90 msec of voltage settling time at any output load condition.

Remote Interface

Agilent E364xA power supplies support any PC with a GPIB (IEEE-488) card or RS-232 interface. Every model ships standard with both GPIB and RS-232. The easy-to-use SCPI (Standard Commands for Programmable Instruments) allow fast and simple programming procedures. Besides, the user manual provides sufficient information on programming for all end users, from beginners to veterans.

Broad Support

VXI plug and play software drivers are available for Agilent VEE, National Instruments LabView™ and LabWindows™. With these drivers, integration of the E364xA into your system can never be any easier. The drivers are supported under Microsoft® Windows 98® and NT®.

Front Panel Operation

An easy-to-use rotary knob and self-guiding keypads allow you to set the output at your desired resolution without any effort. Also, both voltage and current levels can be set to a maximum resolution of 10 mV/1 mA from the front panel. In addition, you can store and recall for up to five complete power supply setups using the internal non-volatile memory.

The output on/off button sets the output to zero. If you own a dual output model, you can view two voltages or currents that are displayed simultaneously.

Versatile Power

Agilent E364xA power supplies give you the flexibility to select from dual output ranges. Output load is protected against overvoltage, which can be easily monitored and adjusted from the front panel and remote interface. Remote sensing is available in the rear terminal to eliminate errors caused by voltage drops on the load leads. These power supplies offer new versatile binding posts on the front panel and screw-type terminals on the rear panel. New front panel binding posts allow you to use safety test leads as well as conventional banana clips and stripped wires. An optional rackmount kit is available. The Agilent E364xA Series employs a cooling fan with automatic speed control to reduce the acoustic noise.

LabView and LabWindows are registered trademarks of National Instruments.
Microsoft Windows 98 and Windows NT are US registered trademarks of Microsoft Corporation.
Highly visible vacuum fluorescent display

Selectable dual range provides flexibility and convenience

Store and recall up to five different operating statuses in non-volatile storage locations

Electronic calibration from the front panel

Set the overvoltage protection and enable the overvoltage protection circuit

Rotary knob for quick and analog-like control of voltage and current

Tough handle for easy carriage and unit prop-up

Versatile binding posts offer flexibility to use safety test leads, banana plugs or stripped wires

1 year warranty protects your investment

Built-in GPIB and RS-232 interfaces

Cooling fan with automatic speed control for low acoustic noise

Rear output and sensing terminals

### Load and Line Regulation ± (% of output + offset)
- Voltage: < 0.01% + 3 mV
- Current: < 0.01% + 250 µA

### Ripple and Noise (20 Hz to 20 MHz)
- Normal Mode Voltage: < 5 mVpp/0.5 mVrms for 8 V/20 V models
- Normal Mode Current: < 4 mA
- Common Mode Current: < 1.5 µA

### Accuracy1 12 Months (@ 25 °C ± 5 °C), ± (% of output + offset)
- Programming Voltage: < 0.05% + 10 mV (< 0.1% + 25 mA for output 2 of E3646/47/48/49 A)
- Readback Voltage: < 0.05% + 5 mV (< 0.1% + 25 mV for output 2 of E3646/47/48/49 A)
- Resolution Program: < 5 mV/1 mA
- Resolution Meter: 10 mV/1 mA
- Transient Response: Less than 50 µsec for output to recover to within 15 mV following a change in output current from full load to half load or vice versa.
- Settling Time2: < 90 msec
- OVP Accuracy, ± (% of output + offset): < 0.5% + 0.5 V
- Activation Time3: < 1.5 msec, OVP ≥ 3 V/< 10 msec, OVP < 3 V
- Temperature Coefficient per °C ± (% of output + offset): Voltage: < 0.01% + 3 mV (< 0.02% + 5 mV for output 2 of E3646/47/48/49 A), Current: < 0.02% + 3 mA

---

1 Accuracy specifications are valid after a 1-hour warm-up with no load and calibration at 25 °C.
2 Maximum time required for the output voltage to change from 1% to 99% or vice versa following the receipt of VOLTage or APPLy command via direct GPIB or RS-232 interface.
3 Average time for output to start and drop after an OVP condition occurred.
Stability, constant load & temperature ± (% output + offset), 8 hrs

| Voltage  | < 0.02% + 2 mV |
| Current  | < 0.1% + 1 mA |

| Remote Sensing | Max. voltage drop in each load lead | 1 V |

| AC Input (47 Hz – 63 Hz) | 100 Vac ± 10% (Opt 0E9)/115 Vac ± 10% (Std)/230 Vac ± 10% (0E3) |

| Warranty | 1 year |

| Product Regulation | Designed to comply with UL3111-1; certified to CSA 22.2 No. 1010.1; conforms to IEC 1010-1; complies with EMC directive 89/336/EEC (Group 1, Class A) |

Agilent E364xA Series Power Supplies
- E3640A 30-Watt Single Power Supply
- E3641A 30-Watt Single Power Supply
- E3642A 50-Watt Single Power Supply
- E3643A 50-Watt Single Power Supply
- E3644A 80-Watt Single Power Supply
- E3645A 80-Watt Single Power Supply
- E3646A 60-Watt Dual Power Supply
- E3647A 60-Watt Dual Power Supply
- E3648A 100-Watt Dual Power Supply
- E3649A 100-Watt Dual Power Supply

Accessories Included
- User’s Guide, Quick Reference Guide and AC power cord

Power Options
- Opt. 0E3 230 Vac ± 10%
- Opt. 0EM 1150 Vac ± 10%
- Opt. 0E9 100 Vac ± 10%

Other Options
- Opt. 1CM Rackmount kit*
  - Single Output (P/N 5063-9240)
  - Dual Output (P/N 5063-9243)
- Opt. UK6 Commercial calibration with test result data
- E3600A-100 Test lead kit

Rackmount Kits*
- Agilent E3640A/41A/42A/43A/44A/45A
  - To rackmount two instruments side-by-side
    - Lock-link Kit (P/N 5061-9694)
    - Flange Kit (P/N 5063-9212)
  - To rackmount one or two instruments in a sliding support shelf
    - Support Shelf (P/N 5063-9255)
    - Slide Kit (P/N 1494-0015) required for support shelf
  - For a single instrument, also order
    - Filter Panel (P/N 5002-3999)
- Agilent E3646A/47A/48A/49A
  - To rackmount two instruments side-by-side
    - Lock-link Kit (P/N 5061-9694)
    - Flange Kit (P/N 5063-9214)
  - To rackmount two instruments in a sliding support shelf
    - Support Shelf (P/N 5063-9256)
    - Slide Kit (P/N 1494-0015)

* Rackmounting with 1CM or lock-link/flange kit requires
- Agilent or customer support rails
- Agilent Support Rails-E3663AC
Our repair and calibration services will get your equipment back to you, performing like new, when promised. You will get full value out of your Agilent equipment throughout its lifetime. Your equipment will be serviced by Agilent-trained technicians using the latest factory calibration procedures, automated repair diagnostics and genuine parts. You will always have the utmost confidence in your measurements.

Agilent offers a wide range of additional expert test and measurement services for your equipment, including initial start-up assistance onsite education and training, as well as design, system integration, and project management.

For more information on repair and calibration services, go to www.agilent.com/find/removealldoubt
