

Software-Set Labview® compatible

Order No. (vide device descriptions)

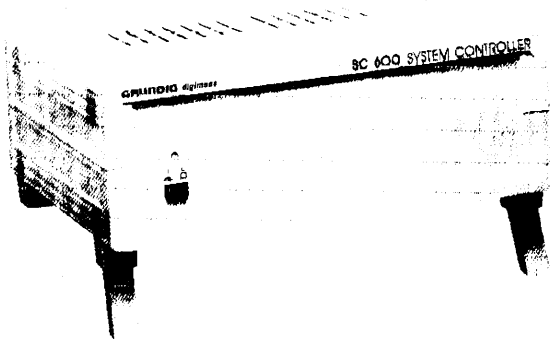

<i>digimess®</i> soft	<i>digimess®</i> compact
<i>digimess®</i> expert	RS-232 C/IEEE-488.2

Enter the world of PC-measuring technique explore the facilities of your *digimess®* instrument. If you dispose of a PC with installed MS Windows®, then you have already made the first step. Our software set contains everything you need to test the team-play between your *digimess®* instrument and your PC. The program disk

contains an executable "virtual instrument" for the test. After you have connected your *digimess®* instrument with your PC by means of the RS-232 cable which is included in the set and after the installation of your program check the remote control function by a "mouse click".

Features:

- executable virtual instrument
- test of the remote control
- remote control via PC
- Labview® driver

SC 600 System Controller

Order No. H.UC 80-00

Software Labview® compatible

Order No. H.UC 80-10

<i>digimess®</i> compact	<i>digimess®</i> soft
	RS-232 C

The SC 600 permits control of up to 6 measuring instruments with an RS-232 interface and its cascading capability enables the number of instruments to be increased accordingly. Each RS-232 input and/or output is optically isolated. The SC 600 can be readily used as an interface switcher.

Features:

- Interface extension to 6 x RS-232 per COM port
- Optical isolation in each direction
- Detection of the connected equipment and its pre-set baud rate
- Optimization of measuring operations
- Minimization of communication with the control PC
- Defined signal processing times
- Cascading option for several controllers
