

Wall Mounted New canopy for wall mounting enclosures S3D

Technical details

New S3D canopy

- Technical features :
 - Steel quality : EN1030 DC01AR
 - Fixing to the enclosure : By means of 4 M6 screws
 - Water's evacuation : From the bottom's side (backward)
 - Steel thickness : 1mm.

Wall Mounted New canopy for wall mounting enclosures S3D

Technical details

Advantages of the new canopy

- The slope allows the water's evacuation towards the back side. This means a bigger safety in the cases that the enclosure is used for outdoor applications (rain...)
- The behaviour against the corrosion is much better than the current canopy.
- Stronger fixing system (bigger strength against pulling out action)
- Rationalisation : The same canopy is valid either for S3D from Sarel and for CRN from Himel
