

# Fast Ethernet - High Performance

## 10/100Mbps Fast Ethernet Adapter

P/N: AEF-380Tx

ADDTRON's AEF-380Tx is a 10/100Mbps based 32-bit Peripheral Component Interconnect (PCI) Local Bus Ethernet adapter. Through 10/100Mbps auto-selectable interface, it is the ideal choice for installations preparing to upgrade to 100Mbps Fast Ethernet. To migrate to 100Base-Tx, first install the Fast Ethernet adapter in new PCs even when users connect to 10Base-T hubs. Later when workgroups need more bandwidth, just upgrade the 10Base-T hubs to 100Base-Tx hubs.

With the PCI interface and bus master architecture, the AEF-380Tx adapter eliminates the bottleneck with the host CPU and provides a robust performance in a heavy throughput environment. Plus, a full-duplex operation is supported to increase the network bandwidth to 20/200Mbps.

A truly plug-in-play solution, AEF-380Tx adapter auto-configure themselves at power-up to avoid the conflicts. An intelligent auto-install software program is incorporated to install the driver for the selected network operating system. Now, connecting your computer to the network just simply plugs the adapter to the computer's PCI slots.

Whatever users requirements are ease of use, 100Mbps migration and high performance, AEF-380Tx is the superior choice.

### KEY FEATURES:

- Complies with IEEE802.3 10Base-T and IEEE802.3u 100Base-Tx standards
- 10/100Mbps data rate
- 32-bit PCI local bus specification revision 2.0 compliant
- Automatic twisted-pair receive polarity detection and correction of the receive polarity
- Full duplex operation
- LEDs for 10/100Mbps detection, port activity and link indicators
- 32/64K on board remote boot ROM socket for diskless workstations
- Comprehensive software driver support for popular networking systems: Novell Netware, Netware Lite, Microsoft LAN Manager, Windows NT, Windows 95, Artisoft LANtastic, FTP PC/TCP, SUN PC/NFS, UNIX STREAMS for SCO UNIX
- 5-year warranty

P/N: AEF-380Tx

## Specifications of the AEF-380Tx Ethernet Adapter

|                                       |   |  |
|---------------------------------------|---|--|
| Chip Set                              | Digital 21140   |  |
| Computer Compatibility                | PCI PC System   |  |
| Software Compatibility                | IPX Drivers                      Novell NetWare 2.x/3.x and Personal NetWare<br>ODI Drivers                     Novell NetWare 2.x/3.x/4.x and Personal NetWare<br>NDIS Drivers                    MS Lan Manager, IBM Lan server, MS Windows for Workgroups, MS Windows NT, Windows 95, Arisoft Lantastic/Al, DEC Pathworks, Banyan Vines.. etc.<br>Packet Drivers                    FTP PC/TCP, Sun PC/NFS |  |
| Configuration(Software Configurable): | Data Bus Width                    32-bit bus<br>I/O Addresses                    Defined by PC System BIOS<br>Interrupt Lines                    INTA (mapped to an IRQ that is assigned by BIOS)   |  |
| Standards Compliance                  | Bus Interface                     32-bit PCI bus<br>Communication                  IEEE 802.3u 100Base-T and 10Base-T<br>Bandwidth                        10/100 Mbps   |  |
| Network Interface                     | RJ-45 port                        IEEE 802.3 10Base-T and IEEE 802.3u 100Base-Tx standards  |  |
| LED Indicators                        | 10Mbps, 100Mbps, Link and Activity  |  |
| Physical Dimensions                   | 140 mm x 90 mm (L x W)  |  |
| Environment                           | Temperature                      Operating: 0 °C to 50 °C                      Storage: -20 °C to 70 °C<br>Humidity                            Operating: 10% to 80% RH                    Storage: 5% to 90% RH  |  |
| Power Requirements                    | UTP port                            +5v @ 0.54A max   |  |
| Emissions                             | FCC Part 15 Class A, <b>CE</b>  |  |
| Warranty                              | Five Years - Limited  |  |
