Product name: PHOTOTRIAC COUPLER

Model No.: 3SF11

(Business dealing name: PC3SF11NTZBF) (Business dealing name: PC3SF11YTZBF)

- 1. These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.
- 2. When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.

(Precautions)

- (1) This product is designed for use in the following application areas;
 - COA equipment · Audio visual equipment · Home appliances
 - · Telecommunication equipment (Terminal) · Measuring equipment
 - Tooling machines Computers

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.

- (2) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as;
 - Transportation control and safety equipment (aircraft, train, automobile etc.)
 - · Traffic signals Gas leakage sensor breakers Rescue and security equipment
 - · Other safety equipment etc.
- (3) Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as;
 - (Space equipment Telecommunication equipment (for trunk lines)
 - · Nuclear power control equipment · Medical equipment etc.
- (4) Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above three paragraphs.
- 3. Please contact and consult with a Sharp sales representative for any questions about this product.

Application

This specification applies to the outline and characteristics of phototriad

Refer to the attached sheet, page 4.

Ratings and characteristics

Refer to the attached sheet, page 5, 6.

Reliability

Refer to the attached sheet, page 7.

5. Outgoing inspection

Refer to the attached sheet, page 8.

6. Supplement

6.1 Business dealing name

6.2 Package specification

Refer to the attached sheet, page 9,10.

- 6.3 Isolation voltage shall be measured in the following method.
 - (1) Short between pins 1 to 3 on the primary side and between pins 4 to 6 on the secondary side.
 - (2) The dielectric withstand tester with zero-cross circuit shall be used.
 - (3) The wave form of applied voltage shall be a sine wave.

(It is recommended that the isolation voltage be measured in insulation oil.)

6.4 This Model is approved by UL and CSA.

Approved Model No.: 3SF11

UL file No.: E64380

CSA file No.: CA95323

CSA approved mark " (S) " shall be indicated on minimum unit package.

6.5 This product is approved by BSI, SEMKO, DEMKO and FIMKO

Approved Model No.: 3SF11

BSI Certificate No.: 6690/7421 (BS EN60065/BS EN60950)

SEMKO Certificate No.: 0033029 DEMKO Certificate No.: 310107

FIMKO Certificate No.: 15795

6.6 This product is not designed against irradiation.

This product is assembled with electrical input and output.

This product incorporates non-coherent light emitting diode.

6.7 ODS materials

This product shall not contain the following materials.

Also, the following materials shall not be used in the production process for this product.

Materials for ODS : CFCs, Halon, Carbon tetrachloride,

1.1.1-Trichloroethane (Methyl chloroform)

Brominated flame retardants 6.8

Specific brominated flame retardants such as the PBBOs and PBBs are not used in this device at all.

7. Notes

- 7.1 Circuit design
- (1) The LED used in the Phototriac coupler generally decreases the light emission power by operation. In case of long operation time, please decide I_F value as 2 times or more of the Maximum value of the Minimum triggering current at circuit design with considering the decreases of the light emission power of the LED. (50% / 5years)
- Input current (I_F) at off state shall be set 0.1mA or less.
- (3) In case that pulse drive is carried out, it shall be recommended to use that the pulse width of input signal is 1ms or more.
- 7.2 Usage

For triggering medium and high power triac.

(This model shall be used in the ON state condition of triggering power triac.)

- 7.3 For cleaning
- (1) Solvent cleaning: Solvent temperature 45°C or less, Immersion for 3 min or less
- (2) Ultrasonic cleaning: The effect to device by ultrasonic cleaning differs by cleaning bath size,

ultrasonic power output, cleaning time, PCB size or device mounting condition etc.

Please test it in actual using condition and confirm that doesn't occur any defect

before starting the ultrasonic cleaning.

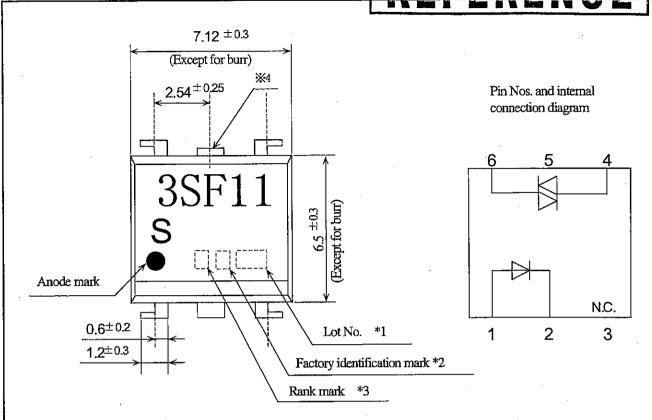

- (3) Applicable solvent: Ethyl alcohol, Methyl alcohol, Isopropyl alcohol
 When the other solvent is used, there are cases that the packaging resin is eroded.
 Please use the other solvent after thorough confirmation is performed in actual using condition.
- 7.4 Precautions for Soldering Phototriac couplers
- (1) In case of flow solder (Whole dipping is possible) It is recommended that flow solder should be at 270°C and within 10 seconds (Pre-heating: 100 to 150°C, 30 to 80 seconds)
- (2) It is recommended that hand soldering should be within 400°C and within 3 seconds: Within 2 times
- (3) Other notes

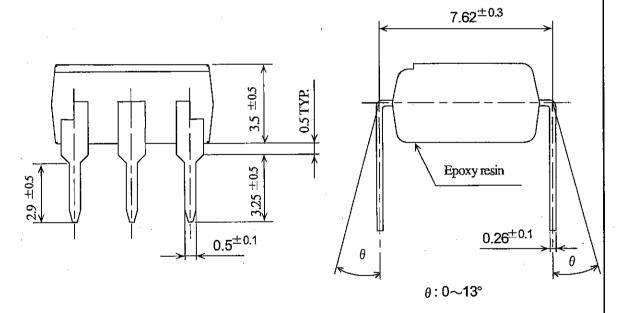

Depend on equipment and soldering conditions (temperature, Using solder etc.),

the effect to junction between PCB and lead pins of photocoupler is different.

Please confirm that there is no problem on the actual use conditions.

REFERENCE 2, 2004

- *1) 2-digit number shall be marked according to OLD DIN standard.
- *2) Factory identification mark shall be or shall not be marked.
- *3) Rank mark: "B"
- *4) Pin 5 is not allowed external connection.

Pin 5 is cut at outside of package.

*5) Pin material: Copper Alloy

Pin finish: SnCu plating (Cu: TYP. 2%)

2	Stopper	Styrene-Elastomer	Products fixed
3	Packing case	Corrugated cardboard	Sleeve packaged
4	Kraft tape	Paper	Lid of packaged case fixed
5	Label	Paper	Model No., quantity, inspection date and lot No. specified

6.2.2 Package method

- (1) MAX. 50pcs. of products shall be packaged in a sleeve and both of sleeve edges shall be fixed by stoppers.
- (2) MAX. 20 sleeves above shall be packaged in a packing case.
- (3) Model No., quantity, inspection date and lot No. shall be marked on the label and this label shall be put on the side of the packaging case.
- (4) Case shall be closed with the lid and enclosed with kraft tape.

6.2.3. Sleeve drawing

Length: $L=520 \pm 2mm$

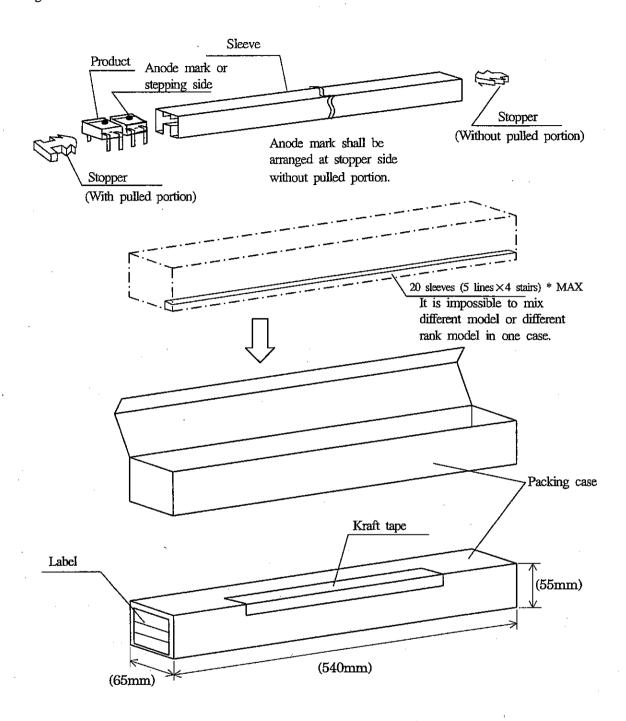

Note 1) Thickness: 0.5±0.2mm

2) Outer R: 0.5mm

- 3) Process with applying antistatic treatment.
- 4) Unless otherwise specified tolerances shall be ± 0.5 mm. (However except for deformation due to the rubber stopper in sleeve.)

6. Precautions in performing isolation test

- 6.1 Partial discharge test methods shall be the ones according to the specifications of EN 60747-5-2
- 6.2 Please don't carry out isolation test (Viso) over UIOTM. This product deteriorates isolation characteristics by partial discharge due to applying high voltage (ex. U_{IOTM}). And there is possibility that this product occurs partial discharge in operating isolation voltage. (U_{IORM}).
