MGBN24	24	970	470	158	

Split load B boards

These are achieved by selecting any 2 Isobar B boards and joining with either **MGBNTJKN** and feeding the top board via a outgoing 100 amp terminal block MGTB1001 for each phase

or use

MGBN63SPL split load kit which is supplied with a 63 amp C curve mcb

Multi service B boards

Control products can be added to any B type distribution board using a modular extension box

MGBNEX034N which will accept 17 single pole wide control products

Specification:

- Designed, manufactured and tested to BS EN 60439-3
- Unique Isobar outgoing phase connection link
- Busbar rating 250A
- Voltage rating 400/415Vac
- Distributed neutral allowing 2 or 4 pole switching at any outgoing way using distributed neutral kit
- Ingress protection IP31 to BS EN 60529
