

Don't allow the installation process to be the weak link in your ESD control program. Provide full protection for your product by shipping a disposable wrist strap with it. By grounding the technician during the install, the opportunity for static related damage is reduced.

Disposable Wrist Strap

This cost effective disposable wrist strap provides static protection and is ideal for one-time use applications. Ship it with your product for static protection at the point of installation. Excellent for field service and remote electronic equipment installations or for short term use by visitors in electronics manufacturing.

This wrist strap is a full 6 feet long allowing you to reach equipment. The wrist loop provides full adjustability without any messy adhesives. A metal clip provides a solid connection to ground, and does not leave adhesive residue like tape. A 1 megohm resistance is contained within the conducting strip. UL listed. Each wrist strap is packaged in a bag with instructions. Custom insert printing is available.

Features

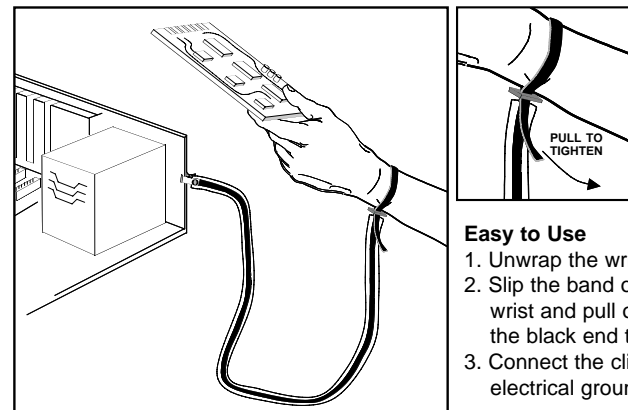

- Low cost static control that ships with your product.
- Full 6 foot length.
- Integral 1 megohm resistance. UL listed for safety.
- Fully adjustable wrist loop - no messy adhesives - encourages use.
- Metal clip for ground connection - no tape residues left on equipment.
- Yellow color for high visibility.
- Each wrist strap is packaged individually with instructions.
