

PR Mounting rail

The "Series DR" terminal blocks can be snapped onto the rails described below.
As the rails are often used as grounding bar, the current values and the correspondance with a copper wire are given below.

Rail	Material	Current	Wire size mm ²
PR2	Steel	47A	6
PR2			101 599.27
PR2	prepunched		164 600.12

Symmetrical rail 15 mm .59" in compliance with EN 50045 standard (DIN 46277.2)

Zinc bichromate plated steel, prepunched sole

length 2 m
6'6" (78") approx.

FE End section

The terminals on terminal boards are systematically insulated from each other, but it is essential to use a special closing section on one of the two extremities.

This section is aligned on and fits onto the insulator by means of several studs.

By using an end section of a different color to that of the terminal blocks, a separation of functions can be achieved.

Type	Thickness	Colours	P/N
Blocks			
FEDR4	1,5 mm .059"		
DR 1/4.GG	grey		114 560.27
DR 1,5/4.GG			
FEDR5	1 mm .039"		
DR 1,5/5	grey		117 318.23
FEDR51	1 mm .039"		
DR 2,5/5	grey		117 668.02
FEDR6	2 mm .079"		
DR 2,5/6.B	grey		114 572.17
FEDR61	1 mm .039"		
DR 4/6...	grey		117 600.03
DRP 4/6	blue		127 600.05
FEDR62	1,5 mm .059"		
DR 2,5/6...	grey		114 771.26

AL Test socket

This accessory is screwed into the tapped hole of the connector bar of the terminal blocks.
This socket can receive a test plug FC.

AL2

167 319.06

PC Comb type jumper bar

This accessory can be used only on the terminal blocks with at least one compression clamp connection. It permits the electrical connection of 2 to 10 blocks.

Interconnection of non-consecutive blocks is possible by removing the teeth opposite the blocks which are not connected. The comb type jumper bars can be cut using pliers or a saw: in this case the use of an SC or FE between two series of interconnected blocks is recommended, to preserve insulation. The comb is placed in the compression clamp before tightening the screws, above the eventual conductor.

PC

Type of blocks	N°	Type	P/N
DR 1,5/5...	10	PC51	167 908.06
DR 4/6... DR 2,5/6... DRP 4/6	10	PC61	163 311.22

BA End stop

The end stops are mounted at the extremity of the terminal board assembly, giving additional support to the terminal blocks as well as a means of terminal marking.

NEW!

BADRL

Screwless DIN 2 rail end stop in grey polyamide VO.

Snaps on rail without a tool.

To remove the end stop, use a screwdriver DIA. 4 mm max. 1/4".

To reposition: Do not slide on the rail.

Remove the end stop and snap again onto rail.

Thickness: 6.5 mm .256"

BADRL 199 420.21
grey body (UL 94 VO)

SC Circuit separator

In order to maintain clearance between 2 blocks equipped with test sockets or between two series of blocks equipped with jumper bar of different potential, the insulator opening must be covered by a circuit separator.

Type	Thickness	Colours	P/N
Blocks			
SCDR61	0,3 mm		
DR 4/6...	grey		173 016.10
DRP 4/6			
SCDR62	0,3 mm		
DR 2,5/6...	grey		167 316.23

FC Test plug

These accessories are used for trouble shooting or testing of an installation, on the blocks equipped with a test socket or by use of a test device.

FC2 Test plug DIA 2 mm .079" (soldered connection : 1mm² max. 18 AWG)
