FOR LIGHT-EMITTING DIODES SIMILAR IN SIZE TO LAMP STYLE T1

Installation Instructions

This fitting can be mounted in any panel having a thickness up to 2 mm (5/64 inch). To insert the bushing, drill a hole approximately 5.2 mm (5/32 inch) or 0.205 inch and remove the protruding burr. Insert the bushing through the front of the panel. While holding the bushing in place, insert the LED from the rear of the panel until the LED snaps into place.

All dimensions are in millimeters and parenthetically in inches and are nominal
