

Facom NS.11A 1/2" Drive Impact Socket 11mm

Description

Specially designed to resist the stresses from impact (section 14), or "Dynapact" tools (section15). Their special steel and heat treatment ensure very high yield strength and wear resistance. All sockets and accessories feature a groove and side-hole to UNI ISO 2725. Locking is ensured by a through-pin and retaining ring (to be ordered separately).

Technical specification:

Never fit chrome-finished manual sockets Impact tools.
