Subject: Product Change Notice

Dear Telit Partner,

Telit would like to inform that the current **Telit EVK2** (P/N 3990150463) has been improved and is going to be replaced by a new P/N.

This change will affect the product coding:

Product Name	Current P/N	Replacement P/N
EVK2	P/N 3990150463	P/N 3990150474

Features and benefits of this PCN:

The new EVK2 is recommended for the development of applications based on Telit GE865-QUAD product, and other new Telit products currently in development. The current EVK2 (P/N 3990150463), is not recommended for the GE865-QUAD. The new EVK2 is also fully compatible with all the Telit products currently available. The improvement consists in updating the serial voltage levels to be compatible with all the products.

Telit technical support will provide an application note to the customers who already own the current EVK2, and are willing to update themselves their EVK2.

For any additional information regarding this notice please contact your Regional Sales Director.

Best regards,

Sandro Spanghero
Telit Communications S.p.A.
