

Description

This kit can be used to set up a safe working area for a single user, a self contained EPA. All Vermason Bench and field service kits are supplied with a guide to Electrostatic discharge control, to enable the user to comply with the recommendations of EN 61340-5-1.

Can be used as a permanent workstation or folded away for field service applications. All components are manufactured in the UK.

Designed to create an EPA, a working space where static-sensitive electronic components may be unpacked and handled with electrostatic charges minimized reducing the risk of being damaged by electrostatic discharges (ESD).

It is suitable for general use - in stores, assembly and packing areas. The mat is static dissipative which has generally been proven to provide protection in electronics manufacturing.

Kit includes:

- Hard-wearing Norastat® work surface with Four 10mm male studs
- Adjustable anti allergenic wrist band set
- Norastat Protector Pad
- Three connection earth bonding point
- Grounding cord
- EPA warning sign
- Vermason booklet "Electrostatic discharge control"

Specifications

Bench mat

R_G: 10⁶ to 5 x 10⁷Ω meets EN 61340-5-1

Thickness: 2mm

Size: 1.2 x 0.6m

Colours: blue, beige

Made in Britain
