

The New Switch Disconnecter 194E for «Safe Separation» up to 315 A

Robust, reliable and cost-effective

Robust, reliable and cost-effective. The modular structure, simple handling and high reliability of the new series of load switches predestine them for the popular Modular Control System MCS. Why not make use of the advantages they offer:

- Easy to select the right product
- Simple assembly
- Simple maintenance
- Designed for the world's markets, conform to all standards and suitable for all applications
- Finger-proof switch design (IP20)
- Splash and dust-proof mechanisms and casings (IP65)
- High switching capacity AC-23A
- Simple fitting and removal of accessories
- Functional, pleasing appearance
- Long operational life
- Withstand hard industrial environments
- Modular, durable system subject to ongoing development and innovations

Installation and panel fittings

The new 194E Switch disconnectors can be installed in every cubicle. Shaft extensions enable them to be operated from the front regardless of cubicle depth

Environmentally friendly switches

- No cadmium in the contacts
- Environmentally friendly materials
- Self-extinguishing materials (UL94-V0)
- Switch materials and packing can be recycled.

Time-saving terminations

- Large clamping space and cable inlets
- Universal terminal screws for flat and round screwdrivers
- Clear terminal markings

Uniform accessories simplify stocking

- Auxiliary contact blocks fit onto all switch body sizes
- Quickly snapped into place without tools
- Reduced stocks

Safe and reliably in operation

- Large 9 mm contact gap between open contacts
- High fault current withstand ensures minimum probability of welding
