DVI Digital/Analogue Monitor Cables

Click on image to enlarge

The DVI/I cables support both Digital and Analogue signal formats within a single assembly. As an integrated cable, this is made possible through the inclusion and use of extra pins within the connector.

Features:

- Fully moulded assembly manufactured using UL 20276 cable
- Available in Single link version only - 18 pin version with extra analogue pins included
- Suitable for bandwidths up to 330 Mhz, up to 15m length only with custom lengths not available
- Signal quality cannot be guaranteed with any cable or cable combination with a combined overall length of more than 10m
