

High Speed Parallel File Transfer Cables

Click on image
▼ to enlarge

Connecting to a PC's parallel port, these cables are used for high speed data transfer. A full 16 line connection ensures they are compatible with **Windows direct cable connection** and other PC to PC transfer protocols. The Hydra Multi-Headed link cable enables serial or parallel transfer.

Features:

- Designed for high speed data transfer
- Windows and MS DOS compatible
- High quality manufactured cable for superior performance
- Fully moulded design, tested for suitability
