

**H03508 Logic Probe**

Logic probe H03508 for MSO (Mixed signal oscilloscope) extension HM03522/3524

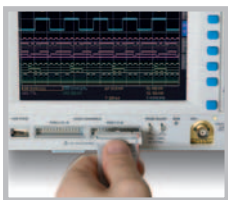

With the logic probe H03508 8 logic channels (LCH0...LCH7 or LCH8...LCH15) are available in MSO mode.

The signal representation on the oscilloscope will be either binary or hexadecimal.

The threshold can be adjusted for 8 logic channels as a group at the oscilloscope.

The activation of the logic channels is indicated by a LED on the logic probe.

Multi pin connector for connection of the logic probe

Measurement with the logic probe

**Specifications**

Channels:	8
Input impedance :	100 k $\Omega$    < 4 pF
Max. input voltage:	40 V (DC + peak AC)
Measuring category:	I
Cable length:	approx. 1 m
