Comments	Most Cameras will accept high capacity batteries as an alternative to the standard battery for longer run time. Please return to the search page for this category & click on your camera or battery model to display a list of alternatives if any. Please note for some cameras, especially where the battery is fitted internally, high capacity alternative battery models may not fit. In these cases only the standard size battery should be fitted to the camera. Do not attempt to force any battery that does not appear to fit as damage to the camera and/or battery may result.
