Easy-to-use Temperature & Humidity Instrument
Versatile probe options: built-in probe head, cable connected probe or wireless probe
### testo 625

*Displays temperature and relative humidity / wet bulb temperature / dewpoint*
*[Max/min values](#)*
*Hold button to freeze readings*
*Backlit display*
*Auto Off function*
*Patented humidity sensor*
*2 year guaranteed long-term stability*
*Optional TopSafe protection case protects against dirt and impact*

#### The testo 625 is an ideal entry level instrument for measurements of temperature, humidity and dewpoint.

Use it to monitor hard-to-reach points in AC and heating system ducts, environmental changes in remote rooms or storage areas, anywhere you need to be two places at the same time or only have one hand free to work. The clear back-lit display can be switched between relative humidity, wet bulb, and dewpoint at the touch of a button.

The testo 625’s temperature / humidity probe can be used 2 ways: either attached to the instrument or connected via a probe handle and cable (optional accessory). Additionally, an optional wireless temperature / humidity probe is available.
