CardBus Series
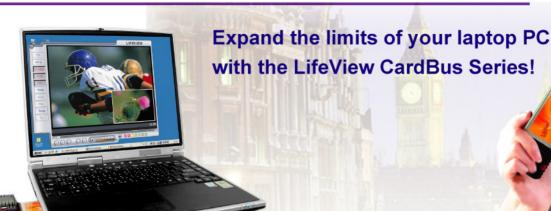

Expand the limits of your laptop PC with the LifeView CardBus Series!

Perfectly complementing the mobility of the notebook PC, LifeView's CardBus solutions let you watch TV anytime, anywhere!

● **FlyDVB Trio CardBus**

The world's first triple reception CardBus gives you DVB-S, DVB-T and analog reception from the same card! Watch digital and analog TV/video simultaneously with true PIP functionality!

● **FlyDVB-T Duo CardBus**

Watch digital and analog TV simultaneously with the FlyDVB-T Duo CardBus! You can even record digital TV while watching analog TV/video and vice versa!

● **FlyDVB-T Hybrid CardBus**

Enjoy digital TV or analog TV with the dual reception of the DVB-T Hybrid CardBus! View crisp, clear digital TV or globally compatible analog TV with the same streamlined solution!

● **FlyDVB-T CardBus**

Experience the vivid, high resolution picture and lush stereo sound of digital television - all on your laptop screen! You can even watch digital TV and video from an external video device simultaneously with LifeView's MST technology!

● **FlyTV CardBus**

With support for worldwide TV and audio decoding standards, you can watch high quality television with stereo sound wherever you are in the world!

● **FlyTV MCE CardBus**

Turn your laptop into an instant video studio with the FlyTV MCE CardBus! True hardware MPEG 1/2/4 encoding gives you smooth, drop-free video capture from analog TV and video from S-Video or composite video!

LifeView®

Color your life, expand your view
