PCMCIA READ/WRITE UNITS

CardWizard transforms your desktop PC by bringing it the full benefits of PCMCIA technology. "PLUG & PLAY" with FAX/MODEM, SAT NAV, NETWORK, SCSI, ATA and a whole range of state of the art PCMCIA cards. Memory and ATA cards appear as logical DOS disk drives, thus allowing data to be transferred just like a floppy, yet much faster, more secure, with far greater storage, and very rugged.

Transfer data between your home or mobile application fast and easily, without the need for multiple floppy diskettes. The CardWizard PC card is a sub three quarter length card which makes it ideal for LAPTOPS which can only take small profile ISA BUS cards. Working from the ISA bus provides a fast and comprehensive platform for all types of PCMCIA cards. The CARDWIZARD family is supplied with all PCMCIA drivers + WINDOWS™ 3.1 drivers as well as the latest FLASH FILING SYSTEM from Microsoft®.
