AUGUST 1990

MODULAR BENCH TOP DRAWER SYSTEM

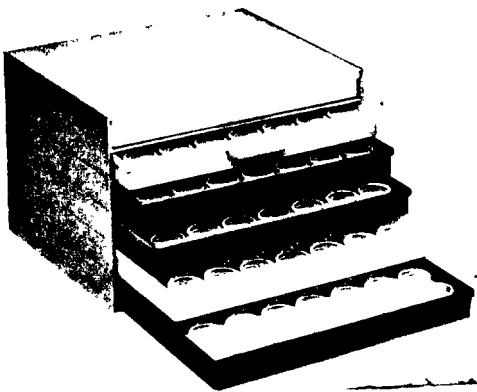

This is a new concept in bench top storage systems for the Mirco-Component Industry, e.g. surface mount.

Individual drawer units can be purchased separately, then simply clipped together on top of one another, to create a complete drawer system to individual requirements.

Each drawer unit comprises an outer cassette, a removable drawer, and an insert which holds 42 clear round containers with lids. Self adhesive labels are provided for each container to enable individual marking.

The drawers are available in five different colours Red, Green, Blue, Yellow and White. The outer cassette unit is in pale grey.

Each drawer system requires a base plinth, which is supplied as a separate item. Only one base is required when the system is first purchased.

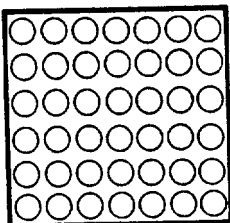

STACKED DRAWER UNITS

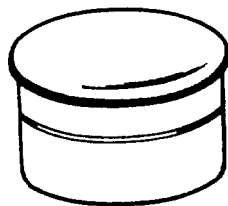

DIMENSIONS M.M.	H	W	D
Drawer Unit	32	273	251
Drawer	25	260	240
Base Plinth	7	273	251
Clear Container	177	30 Dia	27 Int Dia

MATERIALS	
Drawer Units	High impact styrene
Inserts	G.P. styrene
