

iDrive™ lite The intelligent 55W LED Driver

Product Overview

The powerful new **iDrive™** lite LED driver is designed to optimize the performance of high power lighting fixtures using high power LEDs including Luxeon™.

The patented **iDrive™** lite technology enables excellent colour matching and 100% smooth dimming with precise DC current control combined with advanced automatic heat management system to enhance the long life of both fixtures and LED boards.

The 55 Watt system provides a universal voltage input with both UL and CE approvals so you can install them in practically any location.

The **iDrive™** lite has been designed to make installation simple and to save time by using standard power and DMX connectors with a unique user interface to control all **iDrive™** lite functions. There are no complicated DIP switches!

The patented thermal control of attached LED boards, using our unique Colour Cool™ Technology, optimises your LED installation for any environment.

iDrive™ lite can be controlled by DMX512, or use the hundreds of pre-programmed settings to provide independent scenes, colour combinations and effects.
