Add value to your documents

➔ PaperZip® is the ultimate patented way to bind documents. It uses special sheets carrying, on the long side, an adhesive band covered by a strip that has a short tail at its edge;

➔ PaperZip® allows you to print and immediately bind your document or report without using any machinery. The sheets are standard A4 (210X297 mm) and can be used on any printer or photocopying machine available on the market, either ink-jet or laser;

➔ PaperZip® is useful for many purposes: in the office, at home, for internet printouts and for any other document you wish to bind;

➔ PaperZip® is the astonishing idea that enriches your documents and reports, speeds up and simplifies your working habits.

Easy to do

1. Print or photocopy your document on PaperZip® sheets. Before printing read carefully the simple instructions you find in each package.

2. Align your document and complete it with the back cover and front cover. Don't forget that the back cover is essential for a correct binding.

3. Control that sheets, front and back cover are well aligned grouping them upright on a desk and tapping them into place.

4. Place your completed document on a desk and keep it still with one hand.

5. Pull all the strip tabs outwards avoiding any tearing.

6. Press the edge of the document with a finger to complete the binding.

7. Ready to use.
