Help with choosing the right products

Every area a cable management product is used requires an element of health and safety consideration to protect against loss, damage or increased risk of fatalities. To help you make the right choices depending on the installation, HellermannTyton has developed a simple graphical key. Look out for these icons throughout this section.

Construction	Water
Railway	Electricity
Aerospace	Telecommunications
Automotive	Gas
Defence	Utilities
High Chemical Resistance	Tamper Proof
LFH	Low Smoke/fumes
High Oxygen Index	High Temperature Resistance
High Abrasion Resistance	High Strength
VO	Resistance to Moisture
Zero Conductivity	Metal Detectable
Halogen Free	High Resistance to UV Light

HellermannTyton currently supply both Fixed Length and Pull Tight seals, that provide tamper evidence for a wide range of applications from sealing cash and mail bags to securing vehicle doors and roll cages.

Our Pluglok Seal provides an effective closure for a variety of plastic storage and attached lid containers that are now commonly used in transporting goods within the Retail Distribution sector.

A new addition to our range are our Printed Cable Ties. They can be custom printed to suit your requirements and can be used for endless applications such as identifying cables and pipes, creating an audit trail for sealing waste bags and tagging equipment such as cranes and hoists after servicing to show their compliance to Health & Safety regulations.
Pull Tight Security Seal
