

Vacuum Action Insertion Tool for PLCC Chip Carriers

NEW

- Tool is perfectly suitable for the insertion mounting of PLCC chip carriers into their sockets.
- Tool is made of conductive plastic material qualified for active device grounding against static charging.
- Ready for use with pole numbers of 28 to 84.

Application Instruction:

1. Place tool with code-mark perpendicularly over the chip's identification.
2. Press on suction head till the four metal supporting legs fit well to the chip housing.
3. Then position the chip carrier exactly over the PLCC socket and press it in carefully.
4. Break vacuum action by pressing the trigger.
