

## *iStation 26 Speaker Dock*

### **Product Information**

The iStation26 is a feature packed 2.1 Speaker Dock system combined with FM Radio and Alarm Clock, which has been contour designed for use with iPhone & iPod. The unit features a sliding dock mechanism that reveals the concealed Universal Cradle at the touch of a button.

Simply dock any iPhone or iPod and enjoy a clear and warm stereo sound, from the combination of two mid range drivers and a sub-woofer. The sound quality is far superior compared to other docks on the market, as the unit boasts a power efficient Class D amplifier for improved sound performance. Furthermore TDMA Suppression Technology eliminates any interference given off from your iPhone.

The i-Station26 is a lot more than a conventional speaker dock and is a truly feature packed unit. Drift off to sleep to the sound of your music with the sleep setting option, which can also be set to your desired duration.

Wake up raring to go as the alarm option gives you the choice to wake up to FM Radio, Buzzer or music from your docked iPhone or iPod. Furthermore your iPhone/iPod will also be fully powered as the unit trickle charges your device when docked.

This sleek designed unit also features a backlit Blue LCD display that can be set to any one of the three dimming levels. For those who want to enjoy listening to their favourite Radio Stations, simply choose any six of your favorite FM stations and save them as presets.

The i-Station26 can also be used as a stand alone speaker system with numerous portable audio devices. Simply connect the audio device via the 3.5m line in cable provided and enjoy all your music at the touch of a button.

This truly versatile Speaker dock comes complete with a multi-functional remote control that allows you navigate through your iPhone or iPod Menus. The i-Station26 is a complete sound solution.
