

## GLUE STICK Ref. 36307 - 36314

### 1 - PRODUCT DESCRIPTION :

Solid, solvent free adhesive in a stick container for re-stickable bonding.

### 2 - CHARACTERISTICS :

#### \* **Composition**

- 3M microsphere adhesive
- Water based (solvent free)
- Gelling agent + humectant

#### \* **White / opaque appearance**

#### \* **Packaging size**

7 grs or 14 grs PP/PE container stick, in PET blister / cardboard sleeve, or display box...

### 3 - APPLICATIONS / END USES :

- For : Light duty bonding applications, with restickability feature, on :  
Paper, light weight cardboard, photos...

### 4 - PERFORMANCES :

Bonding strength : Below delamination level of regular paper / bond paper internal cohesion, resulting in repositionability feature.

### 5 - MAJOR BENEFITS / FAB :

Feature	Benefit	Advantage
- Special 3M microsphere adhesive	- High adhesion, still re-stickable	- Versatility : permanent bond with repositionability for lay out work, album mounting, temporary decoration....
- Higher solid content	- Concentrated formula	- Covers a large surface per gram
- Water based formula	- No organic volatil compound	- Safe for children use
- Humectant	- Water washable	- Convenient
- Gelling agent	- Prevents stick dry out	- Long shelf life
- Preservative	- Optimum hardness	- Smooth, clump free application
- Quick drying formulation	- Prevents microbial attack	- Covers a large surface per gram
- Large soft plastic cap	- Fast bond	- Excellent conservation in storage
- Pop on / off cap	- Easy to grap	- Saves time
- Locked plunger	- Too large for children to choke on	- Easy to use
	- No screwing required	- Safe for children use
	- Can not be choked on by children	- No mess, no children choking hazard
	- No glue fall out	
	- Won't separate from base	

#### **6 - INSTRUCTIONS OF USE :**

- Remove the cap, and if needed, turn the screw to move up the glue.
- Rub on the application surface with slight pressure, to dispense a consistent layer of adhesive.
- Wait approx. 30 seconds ; assemble both surfaces, and press smoothly.
- Close again the glue stick with the cap.
- Can be cleaned with water.

#### **7 - SAFETY / WARNING :**

- May irritate eyes on contact.
- In case of eye contact, rinse with plenty of water and seek for medical advice.
- Conforms to EN71 standard

#### **8 - DEMONSTRATIONS :**

- Cap design : use small "No choke" demo device to show how we match US requirements, to avoid choking by
- Secure bonding : stick paper on a curved surface to show secure bonding
- Repositionability : apply a consistent layer on a sheet of paper - Separate and re-assemble to show re-stickable feature

#### **9 - CONCLUSIONS :**

"New Formula" glue stick is a unique adhesive stick, designed for repositionability / restickability of paper bonding, in home and school applications. Its water based formula and unique cap and plunger design make it safe to use by children.

This is not a specification, but technical datas are based on laboratory test methods we believe are reliable and representative.
