Dare to be different

One look at HTC Incredible S and you know it's different. The elegant contoured design is so unique that it stands out from any angle. The look, the sound, the feel... it's a phone that impresses the senses.

A standout cinematic experience

The HTC Incredible S brings everything you view to life on a stunning 4" Super LCD screen. So you can browse the web in style, admire your photo gallery, or lose yourself in a video viewing experience. And when you really want to immerse yourself in a movie, plug in your headset and enjoy virtual surround sound via SRS WOW HD™.

Lights, camera, action.

This is your all-in-one 8MP camera and high definition video recorder that will capture and replay every one of your experiences in crystal clear clarity.

HTC Sense

HTC Sense is an experience designed around many little insightful ideas. Ideas that seem so simple, you think "why hasn't any one else thought of that? It just makes sense." It's a phone experience full of lots of little surprises, delighting you every time.

Web, the way you want it - The HTC Incredible S has a super fast 1GHz processor, taking you online in seconds. When you're there, you control how you view the page with a clever zoom in/zoom out function that'll even reflow the text to perfectly fit your screen. And if something sparks your curiosity, simply highlight the text and quickly look it up on Wikipedia, YouTube or the dictionary.

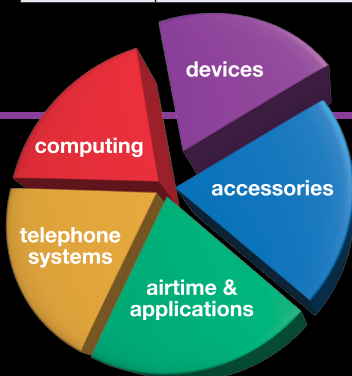

Big becomes bigger - Of course you'll have photos and videos to share with your friends, so impress them when you wirelessly stream what's on your HTC Incredible S direct to the TV via DLNA.

Maps that never keep you waiting - Maps are stored on your HTC Incredible S so you can access them instantly - with zero wait time and zero data roaming fees. Pan left, right, up or down, the details display straight away. And the maps are integrated with a compass so they always point you in the right direction.

A library in your pocket - It's easy to travel light with the HTC Incredible S, because one of its handy traits is an in-built library of great books. So wherever you are, you can flick through some of the preloaded classics, or you can browse and download more books right from your phone.

All your email accounts in one inbox - If you juggle more than one email account, the HTC Incredible S will merge them together so you never miss a thing. They're colour coded so you know what's what, and you can sort them by importance, groups or content.

Intelligent design, down to the buttons - With the HTC Incredible S, all the details have been polished and fine tuned. While other phones support auto landscape rotation for wide screen viewing experience, the HTC Incredible S even rotates the buttons on your phone for easier navigation.
