Smart phone for smart life.

The Android-powered Samsung Galaxy S brings you a powerful mix of advanced hardware that simply out performs it's competitors. The slim 9.9mm Galaxy S gives you the power to shoot full HD video and photos with it's 5 megapixel camera. It's huge 4" Super AMOLED display brings video clips and web pages vividly to life. Built for fast internet access, the Galaxy S has a 1GHz processor and ultra fast data transfer which means you can enjoy exploring the amazing number of apps - more than 30,000 of them.

Stunning 4" SUPER AMOLED Display

- Unrivaled by standard smart phone displays, the ultra-brilliant 4.0" SUPER AMOLED display offers video that's so astonishingly vivid, it's lifelike
- Much brighter, less reflective, and slimmer than general AMOLED
- Free Viewing Angle & Super Fast Response

1GHz Application Processor & Speedy Data transfer

- 1GHz powerful processor enables industry leading overall performance
- Experience the best 3D graphic performance and fast data processing
- Usage time of the device is longer due to power saving processor
- With ultra fast Wi-Fi and lightning-quick 7.2 Mbps 3G connection, Galaxy S lets you access videos, pictures and more in the blink of an eye

HD Video Recording with SUPER AMOLED display

Record videos in HD quality at 30 frames per second. Then view your home movies on the large and bright Super AMOLED screen.

Wireless Tethering

The Wireless Tethering application allows you to connect to the internet on your laptop by tethering to the Galaxy S and using its 3G network connection.

Layar Reality Browser

You just need to capture your surroundings with the GALAXY S camera and you will have an instant POI view of the street. By selecting the spot you require, you will be able to access the address, phone number and more detailed information.

Social Hub

Integrated Communication Channel supports major portals and SNS sites. Samsung provides Unified Inbox, Contacts and Calendar for integrated communications.

AllShare™ via DLNA

Connect AllShare™, via DLNA to a compatible television, and stream videos and photos wirelessly.

Samsung Remote Controller

Control your Samsung TV using the remote controller app.
