BR121E

Combined 3G and 802.11n Pocket Router with Firewall

Mobile high-speed Internet connectivity. Pocket Sized.

Mention an Internet Router and you'll have an image of a Desktop box with antennas, needing a connection to an electrical wall socket. Not any more. Introducing the new **BR121E** 3G capable 802.11n Pocket Router with Safe&Secure™ Firewall Technology.

The first in a new breed of truly pocket-sized Internet Routers with all the power and flexibility of its Desktop Brothers, the **BR121E** is capable of being totally portable due to the long life re-chargeable Battery so you can share your Internet connection anywhere!

But there's so much more. Powerful 802.11n Wireless Networking (with of course no external antennas to adjust), built-in 3G capable* USB Port so you can plug in your existing 3G USB adapter and share your Broadband connection with users attached to either the 80.211n Network or courtesy of its integral Fast Ethernet Switch Port. Ideal for Games Consoles and legacy Desktop Computers too.

Built-in Security has not been taken for granted. A robust SPI Firewall takes care of your Internet connection, together with advanced features such as Port Forwarding. And if required, the **BR121E** can act as a Wireless Bridge or Wireless Client if you need the capabilities of a Wireless Client Card for your Notebook or Desktop, no matter what the Platform use you, be it *Windows™, MAC™* or *Linux™.*
