

# A2P Interface

The A2P interface is a 0-10 volt to PWM converter and is designed to work with ebm-papst 4 wire PWM controlled DC fans. The interface translates the analogue voltage input to an equivalent PWM signal. The interface is matched to the fan so that with its very low power consumption, there is no need for a separate dedicated power supply.

| Part Number    | DC Voltage | Supply Voltage | Ambient Temperature | Max Humidity | Output Duty | Width | Height | Depth |
|----------------|------------|----------------|---------------------|--------------|-------------|-------|--------|-------|
| Part Number    | V          | VDC            | °C                  | % RH         | %           | mm    | mm     | mm    |
| CPC4VV10UN-000 | 0-10       | 12-48          | -20 to +75          | 90           | 0-100       | 45    | 56.5   | 8     |

- Compatible 0-10 volt input
- Consumes <1mA
- Wide operating supply voltage
- Rugged over-moulded construction

| Connection Table |                        |
|------------------|------------------------|
| P                | 0-10 Volt input        |
| Q                | 0 Volt reference input |
| Y                | PWM control output     |
| W                | No Connection          |
| R                | + Supply (12-48Vdc)    |
| B                | - Supply (0V)          |
