

Epson T0453 Magenta Dura Brite Ink Cartridge

The most important advance for the Epson DURABrite ink technology is the development of a pigment ink resistant to water, which does not bleed, and offers a better color rendering. Developed specifically to offer laser-quality black performance and accurate color reproduction regardless of the paper used. The unique composition of this ink achieves a quality always the same on any medium and provides a feeling similar to the original and lasting.

Magenta Ink (250 pages) Epson Durabrite. Suitable for Epson printers:
