Ensure sufficient supply of air.
Avoid formation of oil mist.
Avoid contact with eyes or skin.
If applicable, caution - risk of slipping

6.2 Environmental precautions
If leakage occurs, dam up.
Prevent from entering drainage system.
Prevent surface and ground-water infiltration, as well as ground penetration.
If accidental entry into drainage system occurs, inform responsible authorities.

6.3 Methods for cleaning up
Collect using absorbent material (e.g. Universal binding medium, sand, kieselguhr, sawdust), and dispose of according to point 13.
Oil binder
Do not wash away with water or watery cleaning agents.

7. HANDLING AND STORAGE

Tips for safe handling:
See point 6.1
Avoid formation of oil mist.
Ensure good ventilation.
Keep away from sources of ignition - Do not smoke.
Do not heat to temperatures close to flash point.
Avoid contact with eyes.
Avoid long lasting or intensive contact with skin.
Do not carry cleaning cloths soaked in product in trouser pockets.
Eating, drinking, smoking, as well as food-storage, is prohibited in work-room.
Observe directions on label and instructions for use.

7.2. Storage
Requirements for storage rooms and containers:

8. Exposure Controls/Personal Protection

8.1 Exposure limit values

</thead>
<tbody>
<tr>
<td>WEL-TWA: 5 mg/m³ (ACGIH)</td>
<td>WEL-STE: 10 mg/m³ (ACGIH)</td>
<td>---</td>
</tr>
<tr>
<td>BMGV: ---</td>
<td></td>
<td>Other information: ---</td>
</tr>
</tbody>
</table>

WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period)
WEL-STE = Workplace Exposure Limit - Short-term exposure limit (15-minute reference period).
BMGV = Biological monitoring guidance value
EH40 = "Arbeitsplatzgrenzwert" (workplace limit value, Germany)
Sk = Can be absorbed through skin
Carc = Capable of causing cancer and/or heritable genetic damage

8.2 Exposure controls

8.2.1 Occupational exposure controls

Ensure good ventilation. This can be achieved by local suction or general air extraction.
If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn.
Applies only if maximum permissible exposure values are listed here.
General hygiene measures for the handling of chemicals are applicable.
Wash hands before breaks and at end of work.
Keep away from food, drink and animal feedingstuffs.
Respiratory protection:
Normally not necessary.
With oil mist formation:
Filter A2 P2 (EN 14387), code colour brown, white
Observe wearing time limitations for respiratory protection equipment.
Hand protection:
Protective gloves, oil resistant (EN 374)
If applicable
Protective Neopren gloves (EN 374).
Protective nitrile gloves (EN 374)
Protective PVC gloves (EN 374)
Protective hand cream recommended.
Eye protection:
Tight fitting protective goggles (EN 166) with side protection, with danger of projections.
Skin protection:
Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments)

Additional information on hand protection - No tests have been performed.
Selection made for preparations according to the best available knowledge and information on the ingredients.
Selection of materials derived from glove manufacturer's indications.
Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account.
Selection of a suitable glove depends not only on the material but also on other quality characteristics and varies from manufacturer to manufacturer. In the case of preparations the resistance of glove materials cannot be calculated in advance so it has to be tested before use. The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed.
