

CPUST

Antistatic, mobile Desktop Server Stand

Easily and safely transport your Desktop or Servers.

Are you constantly moving your heavy and delicate Desktops, Servers or Workstations from one location to another? Need ease of access to your Computer Systems without the hassle of wrenching the cables out?

The **CPUST** is a quality and low cost stand for any Desktop, Server, Media Centre or Workstation. With fully adjustable widths, centralised locking and the advantage of being manufactured with antistatic materials to help reduce static build-up which could damage sensitive electronics, the **CPUST** allows perfect clamping of the Computer Enclosure, allowing for a non slip attachment to prevent the Computer tipping.

Other advantages of this design including easy attached Castors, which all 4 are lockable to prevent movement, width adjustable design up to 25.4cm and increased cool air flow design when compared to being placed on a normal flat surface.

Ideal for IT Rooms, Schools, Business or Home Users looking for a price competitive and easy way to locate your existing Desktop, Server and Workstations with minimal effort and maximum security.
