DURACELL ULTRA POWER

OUR BEST AND MOST POWERFUL BATTERY

Within our alkaline battery range, Duracell Ultra Power batteries are designed to get the best performance out of high-draw devices like Digital cameras and out of frequently used devices such as, MP3 players, remote control toys and video game controllers.

Duracell Ultra Power is the only battery that offers the Powercheck feature which offers consumers the ability to how much power is available in each battery. For 9V batteries Powercheck is contained within the pack.

POWERCHECK – integrated tester on every Ultra Power cell (except 9V)
Available in sizes AA, AAA, C, D and 9V

Designed for long lasting performance in high draw frequently used devices.

BATTERY USAGE INSTRUCTIONS

- Always select the correct size and grade of battery that is best matched for your device, read your device instructions to know which batteries to use
- Please replace all batteries of a set at the same time to get optimal use and avoid any chance of discharge or short circuit
- Clean the battery contacts and the battery bay area of your device before you insert the batteries
- Ensure that the batteries are installed correctly with the right polarities (+ and –) matching the device polarities

BATTERY CARE TIPS

Here are some useful tips which will help maximize your experience with Duracell batteries, and ensure safe usage:

- When inserting batteries into your device, please take care to match the right polarities (+ and – ends) marked on the battery to the device
- Batteries which are incorrectly inserted into devices may be short-circuited
- Do not charge regular Duracell batteries (only batteries marked Rechargeable)
- Please avoid mixing used with new batteries, or batteries of different brands
- When replacing batteries in a device, replace them all because different levels of discharge & voltage could lead to venting / leakage
- Fully used batteries should be immediately removed from devices and disposed of properly (as pertained by local laws)
- When discharged batteries are kept in your device for a long time, leakage may occur causing damage to the device
- Avoid deforming or dismantling batteries in any way
- Batteries contain various active ingredients which store electrochemical energy and can be dangerous if they contact your skin
- Store unused batteries in their original packaging and away from metal objects
- Mixing batteries with metal objects can cause the battery to short circuit and affect the battery performance
