

Oregon Scientific ATC Mini Action Camera

Introducing the latest action camera from Oregon Scientific; the ATC Mini Action Camera. The ATC Mini is a super lightweight, compact, waterproof and rugged action camera suitable for the toughest of conditions. The camera records at 720P HD video and can plunge to depths of 20 meters making it suitable for all your on-land, off-land and even underwater activities.

The ATC Mini is a self-contained action camera recording straight to a micro SD (expandable up to 32GB) and includes a removable and rechargeable lithium battery which offers you over 1.5 hours of recording time. The unit includes both a TV-Out jack and Mini USB allowing you to watch video on your TV plus Edit, Save and Share via your PC / Mac.

The ATC Mini features a new super robust mounting system that not only keeps your camera secure and wobble-free during filming it also allows you to adjust the camera in any angle or elevation to get that perfect shot. A full range of accessories are available including hard-shell helmet mount, handle bar mount, Surf mount and vented helmet mount.
