

## 0402 Ceramic Chip Capacitor Kit

Johanson Dielectrics, Inc. offer a variety of multi-layer chip capacitor sample kits for proto-type design work. Each kit is grouped by type, size, or voltage and contains a selection of popular values and tolerances. The chips are individually packaged in labeled plastic compartments for easy access. The general range of NP0 X7R Y5V kit contents is described below.

0402 CERAMIC CHIP CAPACITOR KIT				P/N: S-0402
1400 piece sample assortment of selected values from 1.0pF to 0.1μF				
Chip Size	Voltage Rating	Dielectric	Capacitanc Range	Qty / Value
0402	50 VDC - 6.3 VDC	NP0, X7R, Y5V	1.0pF to 0.22μF	50 pcs
