Vishay Techno

## Thick Film Chip Resistors, High Voltage

### FEATURES

- High voltage up to 3000 V
- Outstanding stability < 0.5 % Flow solderable
- Custom sizes available
- Automatic placement capability
- Tape and reel packaging available Termination style: 3-sided wraparound termination or single termination flip chip HALOGEN FREE standard; 5-sided wraparound termination available
- Internationally standardized sizes Suitable for solderable, epoxy bondable, or wire bondable applications
- Termination material: Solder-coated nickel barrier standard; gold, palladium silver, platinum gold, platinum silver or platinum palladium gold terminations available
  Multiple styles, termination materials and configurations, allow wide design flexibility

- Non-magnetic terminations available Material categorization: For definitions of compliance please see <u>www.vishay.com/doc?99912</u>
  - Lead (Pb)-containing terminations are not RoHS-compliant.

				11G to 50G	5, 10, 20		

#### Notes

(1)

For non-standard sizes, lower values or higher power rating requirement, contact factory. Continuous working voltage shall be  $\sqrt{P} \times R$  or maximum working voltage, whichever is less. Resistance values are calibrated at 100 V<sub>DC</sub>. Calibration at other voltages available upon request. Contact factory for tighter tolerances. Reference only: Not for all values specified. Consult factory for your size and value. (2)

MECHANICAL SPECIFICATIONS				
Resistive element	Ruthenium oxide			
Encapsulation	Glass			
Substrate	96 % alumina			
Termination	Solder-coated nickel barrier standard. Gold, palladium silver, platinum gold, platinum silver, platinum palladium gold terminations available.			
Solder finish	Pure tin or tin/lead solder alloys standard Tin/silver or tin/lead/silver solder alloys available.			

## **ENVIRONMENTAL SPECIFICATIONS**

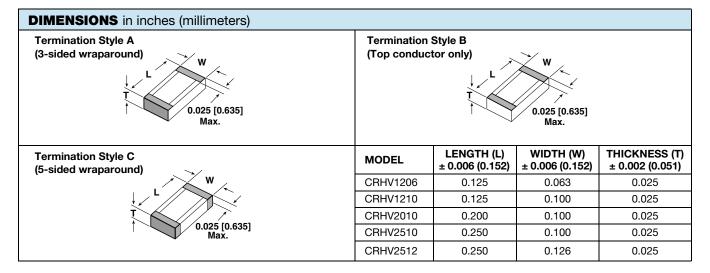

**Operating Temperature:** - 55 °C to + 150 °C

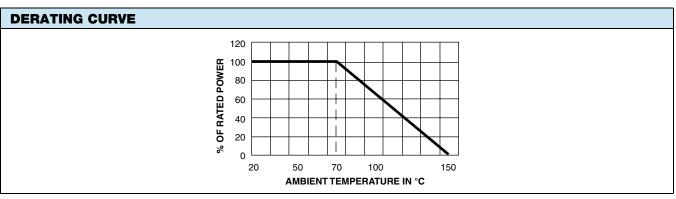

Life: Less than 0.5 % change when tested at full rated power

**Short Time Overload:** Less than 0.5 %  $\Delta R$ 

(Reference only: Not for all values specified. Consult factory for your size and value.)

### Notes

<sup>(1)</sup> Use solder termination N for applications requiring epoxy bondable mounting, and solder terminations D or S for applications requiring solderable mounting.

(2) While not recommended, palladium silver terminations could be used for solderable applications when using a solder alloy containing silver. If the solder paste being used to solder the palladium silver terminated parts to the boards does not have a silver-based composition, then the silver in the terminations could begin to leach when it is exposed to liquidus non-silver-based solders, causing the potential for solderability and/or solder joint issues.

<sup>(3)</sup> Standard solder plating for the nickel barrier parts are solder terminations E or T. Plated termination F and hot solder dipped terminations D or S are also available.

# Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk and agree to fully indemnify and hold Vishay and its distributors harmless from and against any and all claims, liabilities, expenses and damages arising or resulting in connection with such use or sale, including attorneys fees, even if such claim alleges that Vishay or its distributor was negligent regarding the design or manufacture of the part. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.

# **Material Category Policy**

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as RoHS-Compliant fulfill the definitions and restrictions defined under Directive 2011/65/EU of The European Parliament and of the Council of June 8, 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) - recast, unless otherwise specified as non-compliant.

Please note that some Vishay documentation may still make reference to RoHS Directive 2002/95/EC. We confirm that all the products identified as being compliant to Directive 2002/95/EC conform to Directive 2011/65/EU.
