## Starter/Evaluation-Kits

### Accessories

### Setup Software

## iLCD Evaluation and Starter Kits

[Evaluation kits](#) are intended to be used with iLCD panels and modules requiring a separate board for connecting. In addition to the adapter board all required cables, a power supply plug-in adaptor and the CD are contained in the kit as well.

[Starter kits](#) contain the iLCD panel in each case, all required cables, a power supply plug-in adaptor and a CD containing the setup-software and the documentation of all products.

## Evaluation Kits

### Order Number

### Description

DPK-EKIT2432C

Evaluation kit with [DPP-CTS2432](#) 2.8" color iLCD panel and adapter board including 2 x 20-pin FFC-cable for connecting the panel to the board.

[Enlarge](#)

An USB cable and a serial cable, a regulated switcher power supply plug-in adaptor and the CD containing the software and the documentation completes this kit.

DPK-EKIT2440C

Evaluation kit with [DPP-CTS2440](#) 3" color iLCD panel and adapter board including 2 x FFC-cable for connecting the panel to the board.

[Enlarge](#)

An USB cable and a serial cable, a power supply plug-in adaptor and the CD containing the software and the documentation completes this kit.

DPK-EKIT3224C-2

Evaluation kit with [DPP-CTP3224-2](#) 3.5" color iLCD panel and adapter board including 2 x FFC-cable for connecting the panel to the board.

[Enlarge](#)

An USB cable and a serial cable, a power supply plug-in adaptor and the CD containing the software and the documentation completes this kit.

DPK-EKIT4827C

Evaluation kit with [DPP-CT4827](#) 4.3" color iLCD panel and adapter board including 2 x 20-pin FFC-cable for connecting the panel to the board.

An USB cable and a serial cable, a regulated switcher power supply plug-in adaptor and the CD containing the software and the documentation completes this kit.
