## Easy personalisation

### Your phone, your way

With the Nokia Asha 202, you can customise your home screen to make it right for you. For example, you can add a favourite contacts bar to your home screen, or add app shortcuts like the camera and Nokia Browser to access them with one touch.

## Surf more for less

### Easy web browsing

By compressing pages by up to 90%, Nokia Browser ensures smaller downloads, lower data charges, and faster page loads. Now you can enjoy easy navigation with one touch access to options, current page, favourites and web apps.

## Stay connected

### Email, chat and social on the go

Staying connected is easier than ever. The Nokia Asha 202 lets you check live status updates from Facebook and other social networks, connect with Facebook Chat, and keep your email inbox up-to-date.

## 2 megapixel camera

### Catch the moment

It's easy to capture great moments and share them all on Facebook. The Nokia Asha 202 features a touch-enabled 2 megapixel camera - just touch the screen to take a picture.

## Dual SIM

### More freedom

The Nokia Asha 202 lets you keep your personal and work calls separate, it's just like having two mobile phones in one. How it works is simple. You keep one SIM inside the phone, and then swap between multiple SIMs using the slot on the side of the handset.

## Music in your pocket

### Play it loud

For the music fan, the Nokia Asha 202 features a Stereo FM radio and a music player for playing your favourite tunes. Plus, a built-in speaker lets you blast your songs out loud.
