

Apple Lightning to VGA Adapter (MD825ZM/A)
Lightning to VGA Adapter

Use the Lightning to VGA Adapter to mirror whatever's on your iPhone, iPad, or iPod touch with Lightning connector - apps, presentations, websites, and more - on your VGA-equipped TV, display, projector, or other compatible display in up to 720p HD. Video mirroring is supported on all compatible devices.

Watch video on the big screen in up to 1080p by connecting your device with a Lightning connector to a television, projector, or other VGA-compatible display. Video out supports up to 1080p for iPad mini, iPad with Retina display, iPhone 5, and iPod touch.

The Lightning to VGA Adapter connects to your iPad with Retina display, iPad mini, iPhone 5, or iPod touch via the lightning connector and to your projector or display using the VGA adapter.
