Subject: Material & Part Number Change to CCMR/KLDR Series to Comply With RoHS

Document#LFPCN\_PG0028

Date: 10/21/2012

This letter is to inform Littelfuse Sales, Sales Support & Customers of a material change to our CCMR & KLDR Series fuses to meet RoHS standards. The RoHS directive outlines the restriction of the use of certain substances in electrical and electronic equipment. Every CCMR & KLDR rating within our existing offering will be discontinued and replaced by a new RoHS compliant part number which will be identified with an "XP" extension within our ordering system. This is an ordering system extension only and the "XP" will not be visible on the fuse labels. The fuse label will be updated to incorporate the RoHS symbol (see below).

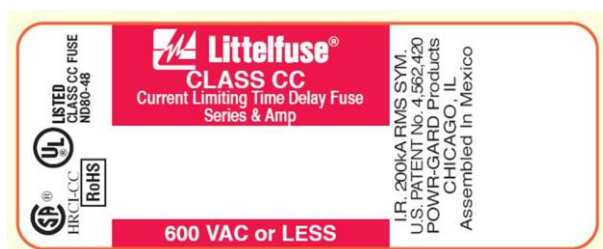

The design change will further enhance the integrity of our supply chain for these products, supporting our commitment to our Global customers' satisfaction and quality. The CCMR and KLDR fuse families will continue to meet all required UL Class CC performance specifications.

The current non-RoHS compliant products will continue to be manufactured through the end of 2012 and will be available until inventory is depleted in 2013. The new RoHS compliant SKUs will be available for sale on 01/07/13. Please update your ordering systems with the replacement part numbers listed on page 2 in 2013.
