CX1031 Socket Adapter:

SOIC20 ZIF
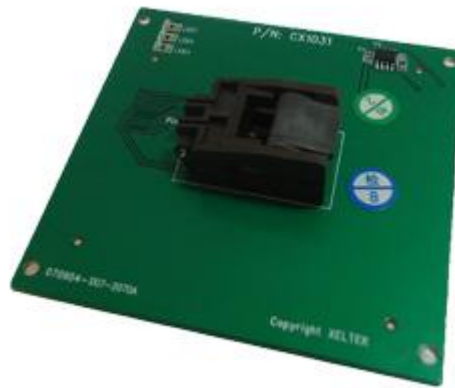

Adapter:	CX1031
Socket:	Package: SOIC20
Socket Life Cycles:	10000 times
Type:	COVER
Dimension:	Pitch=1.27 mm
Size 1: <A> 5.3 mm	Size 2:<B>7.8 mm

Device Insertion Instructions:

- Remove the default DIP48 socket adapter (CX001) from the top of programmer and insert the Clamshell socket adapter on the SP5000 series programmer.
- Open the clamshell socket by pressing the latch.
- Use a Vacuum pick tool (recommended) to place the chip in the socket by following the pin 1 position (as mentioned in adapter information box in software).
- After the chip is firmly placed in socket, close the clamshell socket and begin programming.
- When you finish programming, gently remove the chip (using Vacuum pick tool) from the socket after opening the clamshell.
- Close the clamshell socket by pressing the latch again.
