

Cam Mouse

All-in-One Mouse & Camera

Genius
Live with Ideas

Genius introduces its new 2-in-1 device, the Cam Mouse, an innovative mouse that becomes a camera with instant photo uploading, QR code scanning and more.

The Cam Mouse combines a 1200DPI mouse with a 2.0M pixel camera, bringing you the best of both worlds. And while cameras on notebook monitors are awkward and unwieldy, the Cam Mouse is as easy to use as a small hand-held camera. Plus, it can seamlessly switch between mouse and camera modes in a split second – simply slide open the lens cover and snap away.

The Cam Mouse also makes it easy to share your photos with friends and family. It syncs with social media sites, so you can instantly upload pictures. In addition, the Cam Mouse provides photo-editing tools and scans QR codes.

So if a teacher is about to erase some valuable notes off the board, or if a presenter in a meeting switches slides too quickly, you can take advantage of the Cam Mouse's speed and versatility to take a photo right when you need it.
