LVDS8000 Adapter Board

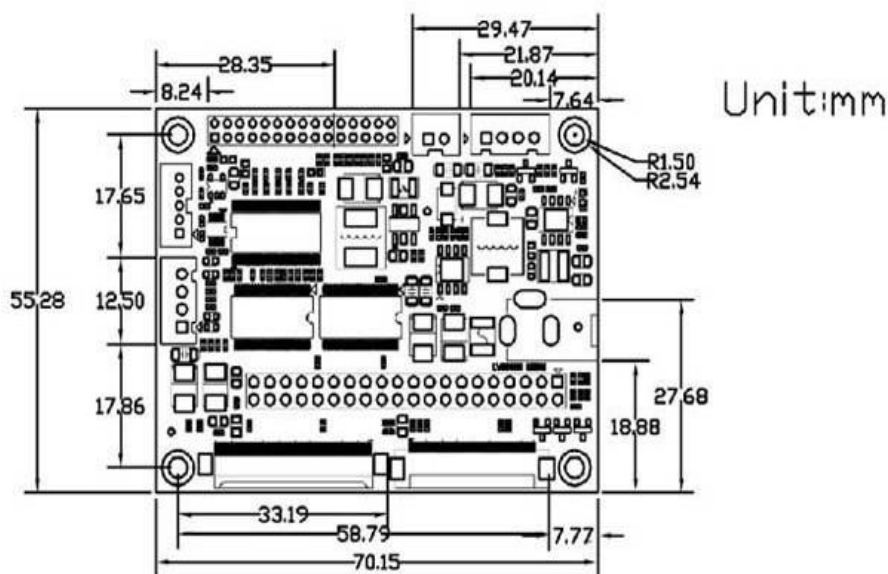

Order#: LVDS8000 (T400334)

LVDS8000 Adapter Board is designed especially for Embest DevKit8500D/A, DevKit8600, SBC8100 Plus, SBC8530 and DevKit7000 boards to allow interfacing to receive and convert LCD signals such as RGB CMOS/TTL signals generated by different boards into 20MHz ~ 85MHz LVDS signals, and then display on a LVDS LCD. Moreover, the LVDS8000 has one 4-wire resistive touch screen interface which allows users to develop touch screen applications easily.

Embest has recommended one LVDS LCD and Touch Screen for working with DevKit8600 board.
