

S660 Preset Totalizer Counter

Remote reset capability

• Input variety: Quadrature, Switch, TTL, CMOS, NAMUR, PNP, NPN

Software functions include:

Password Set Point Programming Display Scaling **Decimal Point Selection**

• 5 amp relay outputs

Optional 12DCV Excitation

The S660 is a versatile totalizing counter that can be adapted to a wide variety of counting, measuring and controlling applications. The control inputs offer several counter operation modes: count/direction, add/add, add/subtract, subtract/subtract, quadrature and reverse quadrature. Optional relay outputs enhance the counter from a passive device to an integral control element for your application.

Specifications

DISPLAY

6-digit, 7-segment, red LED Type Height 0.56" (14.2mm)

Decimal Point User-programmable

Count Direction "+" indication implied, "-" indication displayed

Display Range -99,999 to +999,999

Output Indicators 1 and 2

POWER REQUIREMENTS

AC Voltages 120, 240VAC, ±10%

Power Consumption 3VA

INPUT RATINGS

Current Sinking $10 \text{K}\Omega$ 5% Resistor pull-up to (9.0 - 16DCV) ±10% **Current Sourcing** 5.1KΩ 5% Resistor pull-down to common

Minimum Pulse Width ~5µs

Low Pass Filter

Low Bias $VLT = 1.6V \pm 10\% \ VUT = 3.6V \pm 10\%$ $VLT = 5.0V \pm 10\% \ VUT = 7.0V \pm 10\%$ High Bias

Count Rate 20KHz (Pulse Max) 5KHz (Quadrature X4 Max)

Maximum Voltage Input

A, B, and User 30DCV (Max)

INPUT

User Input (Display Hold) Display is frozen when the User

Input is pulled low.

VLT ≤0.2DCV guaranteed low, VUT = 3.0DCV (max) Standard Input

Quadrature Input VLT ≤ 0.9DCV VUT =3.15DCV (max)

ENVIRONMENTAL

Operating Temp. 0°C to +40°C

Storage Temp. -10°C to +60°C

Relative Humidity 0-80% non-condensing for temperatures less than 32°C, decreasing linearly to 50% at 40°C

Ambient Temperature 25°C

Temp. Coefficient (per °C) ±100ppm/°C Warmup Time 15 minutes

MECHANICAL

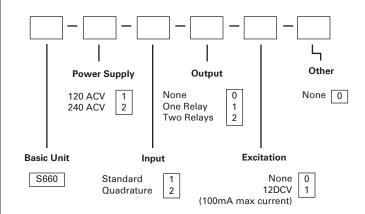

Bezel 3.93" x 2.04" x .52" (99.8mm x 51.8mm x 13.2mm)

Depth 3.24" (82.3mm)

Panel Cutout 3.62" x 1.77" (92mm x 45mm)

Case Material PBT-ABS Weight 9oz (255.1g)

Accessories

Chariot

The Chariot is used to mount most cubestyle quadrature encoders and measuring wheels. Made of anodized aluminum, the chariot includes mounting hardware and selectable pivotal points. Wheels, tires, and flexible shaft couplings are sold separately.

Catalog No. 46012

Flexible Shaft Couplings

The one-piece flexible coupling connects the shaft of a cube-style encoder to an ancillary equipment shaft without worry of misalignment of rotary frequency. The coupling ensures minimum windup, minimum rotary oscillation, and no hysteresis.

A Simpson 12" anodized aluminum measuring wheel is the right choice to complete the setup of a length measurement system. Whether the application requires one or two, Simpson's measuring wheels will perform accurately and reliably throughout the measuring process. Also included on the measuring wheel is a printed alignment scale which assists in the installation and measurement of the length measurement system. Simpson offers four replaceable durometer tires that consist of a black tire that has a longer life span and three non marking tires. The three non marking tires are for delicate materials such as plastics, textiles, wood, metal and paper to prevent tearing, damage or marking of delicate materials.

Description

Coupling: For connecting an encoder to a 3/8" shaft Coupling package: For connecting an encoder to 1/4" or 5/16" diameter shaft*

*Package includes: One flexible coupling (1/2" I.D.) and three reducing inserts (1/4", 5/16", 3/8").
