### OVERVIEW

The Milwaukee® Door Lock Installation Kit saves time and frustration when installing locksets and deadbolts. Designed for accuracy and ease of use, the Door Lock Installation Kit makes it simple to align and drill holes in slab doors. Whether you're remodeling, replacing a damaged door or adding a deadbolt, the auto-centering guide and anti-splinter depth stop let you make centered holes with a clean

finish. This versatile kit works with wood and metal interior and exterior doors from 1-3/8" to 1-3/4" thick.

The 10-piece kit includes an auto-centering drill guide, anti-splinter depth stop, 2-1/8" Ice-Hardened™ hole saw, 1" Ice Hardened™ hole saw, small arbor & PB, arbor adapter and spacer, two 3/32" drill bits and two 1/8" drill bits for pre-drilling holes for latch plate screws.
