

Approved technology in new design

Weller Tools announces design changes for all fume extraction units of the new product line WellerFT

According to the official announcement of the consolidation of Weller Zero-Smog and Filtronic to the new brand WellerFT filter system, all products will be produced in a new unique color.

As of January 2014, all WellerFT extraction units will be delivered in the new design silver grey colour and with changed product labelling. This change does not affect the technical data and the function of the devices.

Please inform your customers immediately of the changes. In our order confirmation you will find information about the deliveries in the new color. During the transition period all units will be labelled on the outer packaging with a color label information. Please check your inventory to prevent mixed shipments to your customers.

The new WellerFT brochure (English only) and the product images can be downloaded according to availability of the products on www.weller.de

Following products are affected of the change.

Part. No	Description	Change date
100-1000-ESD	FILTER UNIT MG100S 100-240V	March 2014
