

DURACELL® CHARGERS

OUR FASTEST CHARGERS

The fastest chargers in the Duracell range can have 4 AAs ready for action in anything from 4 hours to as little as 15 minutes. Our range includes devices for all needs, with simple inexpensive chargers, mobile chargers and multiple independent channel chargers for AA, AAA, C, D and 9V rechargeable batteries.

Safer, more dependable charging

Most of our cell chargers offer multiple protection to ensure safe charging of your batteries. Primary cell protection avoids charging disposable cells. Over-voltage and under-voltage protection avoids overcharging 'dead' batteries, while temperature protection avoids overheating. Chargers also provide reverse polarity and short circuit protection, with built-in LED indicators displaying the charging status.

Did you know that...?

- Like most electronic devices, our chargers can be returned to the appropriate local recycling channel at the end of their life.
- Charging time will depend on the capacity of the battery (the higher, the longer) and the charger design.
- Most Duracell chargers come with rechargeable batteries included.

**DURACELL®
