

USB2.0 EXTENDERS

USB2.0 Over Cat5e/Cat6 Extender

This device is a low cost, high performance USB2.0 extender compliant with USB2.0 specification (up to 480Mb/s). With this device you can extend the transmission distance between a USB device and the host (computer) up to 50 metres, eliminating the 5 metre distance limitation of USB.

System Requirements:

- Win 7 / Vista / Windows 8
- Mac OS 8.6 or above
- One available USB port

Features:

- Support for any High-Speed (480Mb/s), full-speed (12 Mb/s) or low-speed (1.5 Mb/s) USB devices
- Allows a USB device to have its cable length extended up to 50m
- Support suspend/resume detection
- Supports Hot Plug
- No software driver required

Package Contents:

- Local Unit with 1ft USB cable attached
- Remote unit with LED indicator & DC jack
- Power Adaptor
